

## Office Location

Liberty Lake, WA / Helena, MT

## FLSA Status

Non-Exempt

# Electrical Designer

## Position Summary:

Electrical Designer who will lead the development of industrial electrical and control system designs.

Compensation: \$32.00 - \$45.00 hourly rate, depending on experience

Location: Liberty Lake, WA or Helena, MT (relocation assistance available)

## About H2E:

H2E is an electrical engineering consulting firm specializing in electrical engineering, power, automation, controls, and software for industrial and municipal markets.

We hold professional engineering licenses in over thirty US states where we provide professionally guided ideas through our consulting, professionally sound solutions through our engineering, and professional expertise in implementation through our commissioning and startup support.

H2E's core values are Excellence, Communication, and Passion. These core values describe our culture, the expectations we set for ourselves, and the standards we use to hold each other accountable.

## Why join H2E?

H2E is the team that achieves excellence. This is the place where you will apply your experience, skills, and talents to solve problems that make people's lives better. At H2E, we match your commitment to succeed by giving you opportunities to grow while providing you with training and a supportive environment.

### Benefits:

- Competitive pay
- Employer paid premiums for health, dental, and vision insurance
- Long-term disability and life insurance benefits
- 401k with employer match up to 6%
- Company profit sharing
- Paid vacation and sick time
- 10 paid holidays
- Professional development opportunities
- Collaborative team environment

## What you'll do:

- Perform design functions to develop detailed electrical designs for industrial manufacturing and process control systems
- Collaborate with engineers to produce complete sets of drawings for fabrication, bidding, and construction
- Maintain company drafting standard details, templates, and models
- Travel to client/customer sites to support design collaboration and data collection activities

## What you'll bring:

- Associate in applied science degree in power systems (or equivalent) or a Certificate in drafting
- Five years of experience in industrial electrical and control systems design
- Ability to provide leadership, guidance, & instruction to develop drafters and junior staff

## How to Apply:

To apply for this position, email your resume and cover letter to [recruiting@H2Einc.com](mailto:recruiting@H2Einc.com).

In your cover letter, please explain why your experience is relevant to this role.
