Electrical Drafter

Position Summary:

Electrical Drafter who will prepare and revise industrial electrical and control system drawings.

Compensation: \$27.00 - \$35.00 hourly rate, depending on experience

Location: Liberty Lake, WA or Helena, MT

About H2E:

H2E is an electrical engineering consulting firm specializing in electrical engineering, power, automation, controls, and software for industrial and municipal markets.

We hold professional engineering licenses in over thirty US states where we provide professionally guided ideas through our consulting, professionally sound solutions through our engineering, and professional expertise in implementation through our commissioning and startup support.

H2E's core values are Excellence, Communication, and Passion. These core values describe our culture, the expectations we set for ourselves, and the standards we use to hold each other accountable.

Why join H2E?

H2E is the team that achieves excellence. This is the place where you will apply your experience, skills, and talents to solve problems that make people's lives better. At H2E, we match your commitment to succeed by giving you opportunities to grow while providing you with training and a supportive environment.

Benefits:

- Competitive pay
- Employer paid premiums for health, dental, and vision insurance
- Long-term disability and life insurance benefits
- 401k with employer match up to 6%
- Company profit sharing
- Paid vacation and sick time
- 10 paid holidays
- Professional development opportunities
- Collaborative team environment

What you'll do:

- Interpret engineering sketches, redlines, and technical notes to produce accurate electrical drawings
- Collaborate with electrical engineers and project managers to ensure drawings meet technical specifications and project requirements
- Maintain records, designs, and other engineering drawing-related documentation
- Assist in updating and maintaining drawing standards and templates

What you'll bring:

- Certificate in drafting or an associate in applied science degree in power systems (or equivalent)
- Proficiency in Autodesk's AutoCAD or similar CAD development tools
- Desire to learn and apply your drafting experience across a wide variety of industrial settings

How to Apply:

To apply for this position, email your resume and cover letter to recruiting@H2Einc.com.

In your cover letter, please explain why your experience is relevant to this role.
